```

Note

- To execute all the aforementioned REST API endpoints, it is obligatory to provide the Customer Bearer token.

Store Pickup Field description

is_active - Enable the Store Pickup in the slider via the Yes/No option

name - Add the Store Name.

email - Add the Email Address of the Store Pickup.

image - Upload the Store Pickup image.

position - Set Store Pickup Position on the listing page.

store_id - Select Store View for the current Store Pickup.

content - Add Store Pickup Content.

website - Add the Website URL of the Store Pickup

address - Add Address.

country - Select a Country.

state_id - Add a state ID.

region - Add a Region

city - Add a City.
postcode: Add Zip/Postal Code.
contact_no - Add a Phone Number.
url - store pickup detail page URL.
schedule - Add a Pickup store Schedule.
latitude - Add a Latitude.
longitude - Add a Longitude.
identifier - Set a unique Identifier for a particular store pickup or it will autogenerate on save.
meta_title - Set a Meta Title.
meta_keywords - Add a Meta Keywords.
meta_description - Add a Meta description.

Get Store Holidays Data by ID

Endpoint : {{magento_api_url}}/V1/store_holiday/**YourHolidayID**
Method: GET

Response :

```
{
  "id": 2,
  "name": "Christmas",
  "status": true,
  "from_date": "2023-12-25",
  "to_date": "2023-12-31",
  "description": "<p>Christmas Holidays.</p>"
}
```

Get Store Pickup List By SearchCriteria

Endpoint : {{baseurl}}/rest/V1/store_holiday/search
Method: GET

Request:

- Include the following data into **Params** in Postman and went into **Bulk Edit** Past the following structure.

```
searchCriteria[currentPage]:1
searchCriteria[pageSize]:10
searchCriteria[filter_groups][0][filters][0][field]:holiday_id
```

```
searchCriteria[filter_groups][0][filters][0][value]:1
searchCriteria[filter_groups][0][filters][0][condition_type]:eq
```

Response :

```
{
  "items": [
    {
      "id": 2,
      "name": "Christmas",
      "status": true,
      "from_date": "2023-12-25",
      "to_date": "2023-12-31",
