

Store Pickup

FEATURES

- Online store pickup streamlines order fulfillment, eliminating shipping delays.
- Customers choose when and where to collect orders, saving on shipping costs.
- Shoppers can enjoy the physical store and access helpful staff.
- Businesses optimize stock levels efficiently based on online orders.
- Online store pickup enriches the shopping experience.
- Comprehensive store info and multiple pickup options enhance convenience.
- Businesses can suggest additional products during pickup.
- Boosts customer satisfaction and sales while reducing operational costs.

Ultimate Guide for Magento 2 Store Pickup

Introducing Magento 2 Store Pickup extension, here are key points highlighting the benefits and features of the store pickup feature:

- Store pickup allows customers to place online orders and collect them from a physical store, providing them with a convenient and flexible shopping experience.
- By offering store pickup, businesses can increase sales as it caters to the preferences of modern consumers who value efficiency and convenience in their shopping process.
- Utilizing store pickup helps reduce delivery expenses, which can be a significant operational cost for businesses engaged in e-commerce.
- This feature is a promotional tool for brick-and-mortar stores by driving foot traffic and fostering customer engagement in physical retail locations.
- Store pickup is a key component of the Buy-Online-Pick-up-in-Store (BOPIS) service, enriching the overall shopping experience for customers.
- Detailed information about physical store locations and the inclusion of multiple pickup options contribute to an enhanced shopping journey for customers.
- Store pickup reduces customers' overall purchase costs, making it an attractive option for those looking to save money on shipping fees.
- Store pickup aligns the interests of both businesses and customers, resulting in increased sales, decreased operational costs, and an overall improved shopping experience.

How to install the extension

1. Install via composer (recommend)

- Enable maintenance mode **php bin/magento maintenance:enable**
- Run the command **composer require mageinic/store-pickup**
- Run the command **php bin/magento module:enable MageINIC_Core MageINIC_StorePickup**
- Run the command **php bin/magento setup:upgrade** to install the extension
- Run the command **php bin/magento cache:clean** to clean the cache
- Disable maintenance mode **php bin/magento maintenance:disable**
- Check the store environment if everything is working properly. If, at any point, the store displays an error, check the Magento logger for more details.

2. Upload via ZIP/Archive

- Back up your store's database and web directory
 - Download the extension zip file and extract the zip file
 - Transfer the **MageINIC** folder to the Magento 2 **app/code/** directory on the server
 - Enable maintenance mode **php bin/magento maintenance:enable**
 - Run the command **php bin/magento module:enable MageINIC_Core MageINIC_StorePickup**
 - Run the command **php bin/magento setup:upgrade** to install the extension
 - Run the command **php bin/magento cache:clean** to clean the cache
 - Disable maintenance mode **php bin/magento maintenance:disable**
 - Check the store environment if everything is working properly. If, at any point, the store displays an error, check the Magento logger for more details.
-

Extension Configuration

To configure the extension configuration, Please go to **MagelNIC** → **Store Pickup** → **Configuration**

The screenshot shows the MagelNIC dashboard with a sidebar on the left containing various menu items. The 'MAGEINIC' menu is highlighted, and its sub-items are listed: 'Store Pickup', 'Manage Store Pickup', 'Manage Holidays', and 'Configuration'. Red arrows point from these sub-items to their respective labels: 'Administer store pickup' for 'Manage Store Pickup', 'Administer Holidays' for 'Manage Holidays', and 'Administer store pickup Configuration' for 'Configuration'. The main content area shows a summary of business performance with metrics for Revenue (\$0.00), Tax (\$0.00), Shipping (\$0.00), and Quantity (0). Below this is a table of Bestsellers with columns for Items, Total, Product, Price, and Quantity. The table lists one item, 'Push It Messenger Bag', with a total of \$34.00, a price of \$45.00, and a quantity of 6.

The screenshot shows the 'Configuration' page for the 'Store Pickup' extension. The left sidebar contains a list of configuration categories: GENERAL, CATALOG, SECURITY, CUSTOMERS, MARKETING, SALES, SERVICES, MAGEINIC, and ADVANCED. The 'MAGEINIC' category is selected, and the 'Store Pickup' sub-category is highlighted. The main content area is divided into several sections, each with a title and a 'Store View' dropdown. The 'General' section includes 'Enable StorePickup' (set to 'Yes'), 'Store Link Title' (set to 'Store Pickup'), and 'Set Store Link Location' (set to 'Navigation'). The 'Google Map API' section includes 'API Key' (set to 'AlzaSyBnWQ8h_3k6WN5j7ysscB6HEahWd193fE'). The 'Store List Page' section includes 'Page Url' (set to 'pickupstore'), 'Page Title' (set to 'Store Pickup'), 'Meta Description', and 'Meta Keywords'. The 'Search Configuration' section includes 'Default Radius' (set to '100'), 'Maximum Radius' (set to '100'), and 'Length Type' (set to 'Kilometer'). Red arrows point from the configuration fields to their respective labels: 'Activate store pickup module functionality' for 'Enable StorePickup', 'Store Listing Page URL' for 'Page Url', 'Store Listing Page Title' for 'Page Title', 'Meta Description' for 'Meta Description', 'Meta Keywords' for 'Meta Keywords', 'Establish the Max radius for the map' for 'Maximum Radius', and 'Establish the default radius Length' for 'Length Type'.

Add the Store Pickup

The screenshot shows a web form for adding a store pickup. The form is titled "Store Pickup: 'The Home Depot'" and includes a search bar and a user profile icon. The form fields are as follows:

- Store Pickup Title Heading:** "Store Pickup: 'The Home Depot'"
- Manage the visibility of Store Pickup on frontend:** A toggle switch labeled "Enable" with a "Yes" option.
- Store Name:** A text input field containing "The Home Depot".
- Store Email Address:** A text input field containing "test@homedepot.com".
- Store Image:** A section with "Upload" and "Select from Gallery" buttons. Below the buttons is a preview of a Home Depot store image. The text "Maximum file size: 4 MB. Allowed file types: JPG, GIF, PNG." is displayed above the image.
- Set Position:** A dropdown menu labeled "Position" with the value "1".
- Store View For Store Pickup:** A dropdown menu labeled "Store View" with options: "All Store Views", "Main Website", "Main Website Store", and "Default Store View".
- Store Content:** A rich text editor with a toolbar and a text area containing "Chain home improvement retailer for tools, appliances & other products (some offer truck rentals)."
- Add Store Website:** A text input field labeled "Website" containing "http://homedepot.com". Below the field is a placeholder text "Provide pickup store website URL."

Please go to **Add New Store Pickup** on the Store Pickup grid page.

Enable - Enable the Store Pickup in the slider via the Yes/No option

Store Name - Add the Store Name.

Store Email - Add the Email Address of the Store Pickup.

Store Image - Upload the Store Pickup image.

Position - Set Store Pickup Position on the listing page.

Store View - Select Store View for the current Store Pickup.

Store Content - Add Store Pickup Content.

Website - Add the Website URL of the Store Pickup.

Store Address & Locator

Store Address & Locator

The screenshot shows a web form titled "Store Address & Locator". The form contains several input fields and dropdown menus, each with a red arrow pointing to it from an external label:

- Address**: A text input field containing "3040 Slauson Ave, Hawthorne Park, United States". A red arrow labeled "Set Address Info" points to this field.
- Country**: A dropdown menu showing "United States".
- State/Region**: A dropdown menu showing "California".
- City**: A text input field containing "Los Angeles".
- Zip/Postal Code**: A text input field containing "CA 90220".
- Phone Number**: A text input field containing "3235875520". A red arrow labeled "Set Phone number" points to this field.
- Latitude**: A text input field containing "33.987890". A red arrow labeled "Set Lat Long" points to this field. Below the field is a small note: "Note: Valid latitudes values are from -85 to 85 degrees..".
- Longitude**: A text input field containing "-118.214770". A red arrow labeled "Set Lat Long" points to this field. Below the field is a small note: "Note: Valid longitude values are from -180 to 180 degrees..".
- Map**: A section with a "Get Coordinates" button and a map area. A red arrow labeled "Google Map" points to the map area. The map area displays an error message: "Sorry! Something went wrong. This page didn't load Google Maps correctly. See the JavaScript console for technical details."

Address - Add Address.

Country - Select a Country.

State/Region - Add a State/Region.

City - Add a City.

Zip/Postal Code: Add Zip/Postal Code.

Phone Number - Add a Phone Number.

Latitude - Add a Latitude.

Longitude - Add a Longitude.

Map: Map Preview to see coordinates.
